

AccuPoint® Advanced Next Generation

A Complete Sanitation Monitoring System

We Care

Across healthcare, ATP testing is a proven, reliable, and unbiased industry standard for cleanliness verification. AccuPoint® Advanced Next Generation (NG) is designed to recover and detect even the smallest amounts of ATP with one-hand, single-step activation that measures relative cleanliness in less than 20 seconds.

Designed and Engineered for the Healthcare Industry, AccuPoint Advanced NG Provides:

- Patented flat head sampler for optimal recovery and consistent sampling
- Ergonomically designed reader with a touch screen
- Data reporting based on CDC recommendations
- Bac-Track ATP system and Outbreak Management Tool powered by Bonafide

Hospital Acquired Infections (HAI) outbreaks can cost \$16,000+ per episode, and the CDC encourages hospitals to develop programs to optimize the thoroughness of high-touch surface cleaning, with ATP testing as a recommended Level 2 Environmental Hygienic Practice. AccuPoint Advanced NG helps you reduce environmentally transmitted HAIs by measuring the amount of organic residue left behind on surfaces after cleaning. Less residue on surfaces means a cleaner environment, which can help lower the chance of infections.

Item No. 9904A, 9904E, 9904P, and 9905

AccuPoint® Advanced NG Offers You:

- Data-driven verification of effective cleaning
- Improved patient experiences, resulting in higher HCAHPS scores
- Documentation that supports your infection prevention measures

A way to quantify cleaning outcomes and mentor your staff. AccuPoint Advanced NG's Data Manager software has been developed based on customer and CDC recommendations to provide the best and easiest reporting options. Easily filter detailed reports and summary charts by area, room number, test sites, and staff to understand your data.

Taking time to document, verify, and report cleanliness helps confirm your commitment to the community and strengthen your reputation for excellent care. AccuPoint Advanced NG gives you a superior reporting tool to confirm cleanliness, showing the pride you take in healing, respecting, and caring for every patient.
