

AccuPoint® Advanced Next Generation

A Complete Sanitation Monitoring System

Meet the New Powerhouse

Explore Our New System:

- Fast, actionable results combined with customizable data analytics for the most prescriptive food safety plan possible
- Suite of software
- Touch screen instrument makes tracking results to areas and sites fast and easy
- Wi-Fi connectivity giving quick results to your test plan
- Easy to hold, robust, rubberized edges for protection on-site

Take all of this and pair with our unrivaled, flat surface sampler, and you have a complete sanitation monitoring system!

Benefits Include:

- We will preload your test plan into the software and train all users
- We train on how to use our new NEOGEN® Analytics Insights cloud-based software
- 24/7 global support

Bonus:

NEOGEN Analytics Insights is a cloud-based software program with powerful dashboards and automatic reporting features to take your program to the next level.
